International LegalTech Competition

AI-POWERED LEGAL PRACTICE: UPHOLDING THE RULE OF LAW

Dear Legal Innovators,

we are thrilled to extend an invitation for your participation in the upcoming edition of the International Legal Tech Competition, with the captivating theme "AI-Powered Legal Practice: Upholding the Rule of Law" This competition presents a remarkable opportunity for legal professionals and tech enthusiasts to explore the transformative potential of artificial intelligence (AI) within the legal domain.

In our ever-evolving legal landscape, the role of AI is taking center stage. Advanced AI models are poised to catalyze profound changes in legal services. Legal practitioners are not only exploring the prospects of leveraging algorithms to enhance their work but also confronting the far-reaching implications of AI on the functionality of legal systems. The European Bars Federation is committed to fostering a reliable and ethical approach to AI—one that upholds fundamental rights and embodies shared European values.

Your mission in this competition is to craft a project that delves into the utilization of AI and its impact on legal services, with a specific emphasis on practical implications—both current and prospective—within the legal sphere. We eagerly anticipate your participation in this edition of ILTC. For further details, please visit https://www.fbe.org/.

President of the FBE New Technologies Commission

Focus areas

AI-Powered Legal Assistance: How can AI support legal professionals? Your challenge may involve creating AI-driven tools that elevate lawyers' productivity and accuracy, all while ensuring these tools adhere to ethical guidelines and augment, rather than replace, human decision-making.

Regulatory Compliance and AI: Explore the intricate legal and regulatory frameworks governing AI's role in the legal realm. Propose innovative methods to ensure adherence to these regulations while preserving the Rule of Law.

Human-Centric LegalTech: We invite you to present Human-Centric LegalTech solutions that prioritize the needs and values of both legal professionals and clients. Your solutions should be intuitive, accessible, and firmly aligned with ethical principles, ultimately empowering humans.

Ethical AI in Legal Decision-Making: Investigate the deployment of AI technologies in legal decision-making processes, scrutinizing issues of fairness, bias, transparency, and accountability. Propose solutions that amplify the ethical dimensions of AI in the legal field.
